Dear Senators Schumer and Gillibrand and Congressmen Rangel and Nadler:

Thank you for co-sponsoring H.R. 2766/S. 1215 to repeal the exemption for hydraulic fracturing in the Safe Drinking Water Act and to require public disclosure of the chemicals used in hydraulic fracturing fluids.

I am very concerned that some communities across the country are already suffering from drinking water contamination linked to hydraulic fracturing operations. The use of hydraulic fracturing to extract natural gas should be banned nationwide.

Natural gas may be an important part of our energy portfolio, but the right balance needs to be established between oil and gas development and protection of our precious natural resources, including clean air and clean water. Every American deserves clean drinking water.

Please use your influence to move this bill from committee to a full vote.

Sincerely,
