

Three Parks Independent Democrats

**A Health Care Petition to U.S. Senators Schumer and Gillibrand
and Representatives Rangel and Nadler**

We the undersigned support the U.S. National Health Care Act (H.R. 676), a universal program similar to Medicare but open to all. Such a system would minimize the role of private for-profit health insurance companies that annually waste billions of our health care dollars on administration, advertising and dividends. We urge our representatives in the House to bring this bill out of committee for a fair hearing.
